**ViaPlus Wins Two Contracts for Multi-Lane Free-Flow Toll Systems in India**

- Contracts include delivery and operation of free-flow systems at toll plazas in northern India
- ViaPlus technologies support India's shift to barrier-free highway tolling
- Awards strengthen ViaPlus' long-term presence and industry leadership in India

ViaPlus, a subsidiary of VINCI Highways, has secured two end-to-end contracts in India to provide free-flow toll systems along the Delhi-Jaipur Expressway and the Delhi-Faridabad Skyway. These awards further strengthen ViaPlus' leadership in supporting India's transition to next-generation, barrier-free electronic tolling.

The contract for the Delhi-Jaipur Expressway covers the installation and operation of free-flow technology at Daultapura. The 242km (150 miles)-long, 6-lane expressway links the National Capital Territory of Delhi with Jaipur in the state of Rajasthan, and supports ten million vehicles annually. In a second milestone, ViaPlus will also install and operate its toll processing technologies along the elevated Delhi-Faridabad Skyway at Badarpur. Located in the capital of New Delhi, the site sits along one of northern India's busiest corridors serving hundreds of thousands of daily commuters. Both contracts are awarded through Indian banks under the authority of the India Highways Management Company Limited (IHMCL).

At both locations, ViaPlus will deliver its advanced Alpha® back-office platform, integrate roadside systems in collaboration with Sidra Systems, and implement the Sightline® image review technology to process license plate transactions for vehicles without FASTag. Collectively, these projects reinforce ViaPlus' expanding presence in one of the world's fastest growing tolling markets and underscore its ability to manage complex, high-volume toll environments with speed, accuracy, and reliability. In 2025, ViaPlus' Alpha® platform - deployed across India - processed over 2.7 billion of the country's electronic toll collection (ETC) transactions, representing 40% of all toll transactions nationwide. ViaPlus facilitates over 4.2 billion mobility transactions globally each year.

ViaPlus has been a trusted tolling partner in India for many years, supporting the country's ambitious shift toward free-flow mobility. These new projects reflect the strength of ViaPlus technology and operational excellence, and will advance faster, cleaner, and more seamless travel experiences for the millions of drivers moving through India's busiest corridors.

**About ViaPlus**

ViaPlus is a global mobility company serving the transportation industry with technical and operational solutions. Our customer operations, data analytics, and signature back-office technology facilitate over four billion transactions annually for seamless multimodal mobility. ViaPlus connects AI and machine learning with operational excellence and industry expertise to deliver solutions for electronic tolling, EV charging, mobility customer services, and road user charging. As a VINCI Highways subsidiary, we are committed to innovation and to promoting a positive mobility experience for all.
