Platform Capabilities

Turning Complex Data Into Clear and Actionable Insights

- Unified data platform ingests and secures multi-source data
- Delivers validated datasets through a cloud-based analytics foundation
- Real-time and predictive analytics with near real-time insights
- Enables hourly deep dives and event-based forecasting
- Interactive dashboards combining key metrics and trends in one view
- Supports comparisons across periods, budgets, and reference years
- Flexible reporting experience with prebuilt and ad-hoc reports
- Includes natural language (generative AI) report creation
- Advanced filtering and scale across assets and events
- Allows calendar-based comparisons and operational analysis
